EXPERIENCE

Intern - Backend Developer

Aug 2025 — Jan 2026

Social Economy Accelerator Lab

Singosari, Malang

- Inherited and stabilized a legacy Laravel REST API backing a Traccar-based fleet management system
- Refactored REST endpoints for clarity and maintainability
- Developed backend features for fleet tracking and monitoring workflows
- Managed production deployments
- Collaborated with web frontend and mobile developers on API integration

- Laravel
- MySQL
- Traccar
- TimescaleDB
- Docker
- Postman

PROJECTS

Portfolio Website (byhaqi.my.id)

Apr 2026 — Present

Designed to look like a CV. Delvelop with simple structure in mind to build CV looking design. Made to learn Astro, Widen frontend knowledge, and to fulfill the need of a portfolio Website.

- Astro
- Cloudflare Workers

Picsme (picsme.byhaqi.my.id)

Sep 2026 — Present

Self studio app that can be used directly in the browser. Can also be deployed at any event with any device that can run a browser and have a selfie camera. Co-develop with AI Agents, planned using grill-with-docs. Made as a case study to learn Tanstack Start and Cloudflare Workers

- Tanstack Start
- React
- Vite
- Tailwind CSS
- Vitest
- Cloudflare Workers
- Drizzle ORM
- Cloudflare D1 (SQLite)
- Cloudflare R2 (Object Storage)
